

Gold: Uptrend still appears intact.

Weekly: Note 200 day MA (40 week MA) Support endures.

- Despite a nearly 30% decline in Open Interest since November, prices held Gann *2x1* long-term uptrend line (parallels 200 day MA).
- Commercials move back to their least short (ie, most bullish) position in 1½ years.
- 'Fast Stochs' turn up again.

Gold: 'Bull Flag' breach to the upside breaks recent consolidation deadlock?

Daily: What may have appeared as a possible intermediate multi top may have given way to a 'Bull Flag' upside breach, suggesting continuation of secular uptrend, for now.

- 'Stochs' turn up again.
- MACD appears on the verge of turning up.
- 18 day MA, currently @ \$1360. appears as Minor Resistance may prove well vulnerable over the near-term.
