

Sugar: After losing 75% in just 3 months, is a rebound imminent?

Weekly:

- Commercials pare back their short position to their least bearish stance since 2009. Meanwhile Small Specs turn net short!
- Index Funds increasing their long position since their low ebb back in January
- Technicals, having been over-sold, just now turning up.

Daily: Close above 22¢ might provoke re-entry of longs?

- Technicals straining at their most over-sold levels in months; imminent turn to the upside?
- Spreads appear to be trying to turn up.
