

US Treasury (30 year): Daily: Uptrend continues unabated.

ZBU14 - T-Bond - Daily Nearest Candlestick Chart

Bears' case compromised:

- Downside failure on July 3,
- Upside breach of Gann *2x1* short-lived downtrend on July 20.
- Technicals have reverted back to the upside.
- Values remain above key moving averages.
- US Treasuries is included with other global upside bond markets.

A sustained breach of *3x1* secular Uptrend may revive downside prospects.
